# Multi-GEO support ist GA

**End user chat data:** in a 1:1 or 1:N chat, the creator of the chat is the data “owner” and the PDL of that end user will determine where the chat data sits

**Meeting chat data:** the organizer of the meeting is the data “owner” and the PDL of the organizer will determine where the meeting chat data sits

**Team and channel data:** the team is the data “owner” and is backed by a Microsoft 365 group, meaning the Microsoft 365 group’s PDL will determine where the data sits
