

A woman with curly hair, wearing a blue jacket, stands at the front of a meeting room, pointing at a whiteboard. She is addressing a group of people seated at tables. The room has large windows and a whiteboard with handwritten notes. The whiteboard text includes: "MEETING TODAY", "APPS", "SUMMER VACATION WEEKLY AGENDA", "DAYS: SET COLOUR!", "COMENE", "DAVE: US", and "BONUS BASED COMPAN".

SharePoint Advanced Management / Copilot Governance

SharePoint Advanced Management

- SharePoint hat OOTB Management / Reporting Features erhalten
- Mit der Ignite mehrere Updates angekündigt

			
Manage content sprawl	Prevent oversharing	Control Copilot access to content	Manage content lifecycle
Governing ever-increasing digital content is critical for every SharePoint or IT admins.	Lack of built-in tools to identify oversharing and broken content inheritance put the content at risk, especially in the new AI era.	Existing tools take too long to act. Capabilities that can take actions near real time will be important to control content that Copilot can access and disseminate.	Lack of advanced management tools to continuously monitor and govern inactive/active SharePoint sites content make it hard to meet various access and regulatory requirements.

Manage Content Sprawl

×

Initiate site access review

An email will be sent to all site owners, with a request for them to review the sites for potential oversharing.

Add a comment for site owners

Kindly validate if these are shared beyond what is necessary.

Prevent Oversharing Owner Policy

Configure policy

Who should be responsible for each site? * ⓘ

- Site owners
- Site admins

Minimum owners or admins required for each site *

Who should be notified (via email) to assign or claim site responsibility? *

If a site has less than minimum owners or admins, chosen recipients will be notified. It is recommended to ensure at least 3 options are selected to increase likelihood of finding an owner.

- Current site owners, if any
- Current site admins, if any
- Manager of previous site owner or admin ⓘ
- Active site members ⓘ

Select maximum number of active site members to be notified

Which action do you want to take if a site remains ownerless for more than 3 months?

ⓘ Enforcement actions cannot be edited after policy creation

Chosen action will be taken on the site if the recipients do not accept ownership or if there is no one to be notified.

Set access to read-only
Users can view site content, but can't edit it.

No change in access
Users can continue to use the site even when there is no owner.

Control M365 Copilot Content Access

Restricted Content Discovery

```
Set-SPOsite -identity <site-url> -RestrictContentOrgWideSearch $true
```

Content Lifecycle

Configure policy PREVIEW

Who should be notified via email if site has been inactive? *

Recipients will be able to certify the site to keep it active.

- Site owners
- Site admins

What action should the policy take on inactive sites that have not been certified by site owners or site admins after 3 notifications? *

i Enforcement actions cannot be edited after policy creation

- Do nothing
- Take an enforcement

Users will be able to access the site content depending on the selected action.

Select an enforcement type:

- Read-only access
- Archive sites after mandatory read-only period RECOMMENDED

Users cannot access archived sites.

Duration of read-only period *

Select duration ▼

- Aktion basierend auf Ergebnis konfigurieren

Copilot Purview DLP Policy

The screenshot shows the Microsoft Purview 'Create rule' configuration page. The left sidebar contains a navigation menu with the following items: 'Template or custom policy' (checked), 'Name' (checked), 'Admin units' (checked), 'Locations' (checked), 'Policy settings' (selected), 'Advanced DLP rules', 'Policy mode', and 'Finish'. The main content area is titled 'Create rule' and includes sections for 'Sensitivity labels' (currently set to 'Obsidian Merger'), 'Evaluate predicate for (available for Exchange workload only)' (with radio buttons for 'Message or attachment', 'Message only', and 'Attachments only'), and 'Actions'. The 'Actions' section is highlighted with a purple border and contains the following text: 'Use actions to protect content when the conditions are met.', 'Prevent Copilot from processing content' (with a trash icon), 'Content that matches your conditions won't be used by Copilot to generate responses. [Learn more about this action](#)', a note: 'Currently, this action is supported only for labeled files in SharePoint and OneDrive that are processed in Microsoft 365 Chat experiences.', and a checked checkbox: 'Exclude content from processing in Copilot' (with an info icon). At the bottom of the page are 'Save' and 'Cancel' buttons.
